

## Narrative Financial Analysis Report

Advisors use the narrative report with clients to provide them with a deeper understanding of their financial health. The narrative report turns financial statements into a plain language narrative text that accountants use to help their clients make better business decisions. During economic struggle, use it to evaluate financial health and pinpoint focus areas.

- Easy to understand language
- Graphics showing strengths and weakness
- Historical and peer comparisons
- Customizable report including the firm's brand

Generally, this metric measures the overall liquidity position of a company. It is certainly not a perfect barometer, but it is a good one. Watch for big decreases in this number over time. Make sure the accounts listed in "current assets" are collectible. The higher the ratio, the more liquid the company is.

This is another good indicator of liquidity, although by itself, it is not a perfect one. If there are receivable accounts included in the numerator, they should be collectible. Look at the length of time the company has to pay the amount listed in the denominator (current liabilities). The higher the number, the stronger the company.

### About ProfitCents:

ProfitCents is a financial information company that provides accounting, risk management, financial analysis and business valuation technology solutions to financial services firms and financial institutions. Our mission is to make complicated financial information easier to understand and analyze. Thousands of accounting firms, banks, credit unions, valuation firms and private companies use our applications and information to analyze private-company performance, determine the value of businesses, understand industry trends and assess the credit risk of borrowers. ProfitCents provides the largest real-time database of private-company financial statement information in the United States.
